SDET | QA Automation Engineer | 2+ Years | Selenium | Playwright | Java | REST Assured | API Testing | SQL

Professional Summary

QA Automation Engineer (SDET) with 2+ years of experience in Manual, Automation, API, and Database Testing for enterprise web applications across E-Retail, IT Service Management and Healthcare Recruitment domains. Designs and automates 300+ UI, API, and database test cases across 3 production domains while working closely with developers and product owners in sprint-based Agile releases. Builds and maintains Selenium WebDriver (Java) and Playwright (TypeScript) automation frameworks using TestNG and the Page Object Model. Validates REST APIs using REST Assured and Postman, verifies backend data through SQL. Integrates automation suites with Jenkins and GitHub Actions for CI/CD execution.

Skills and Technology

- **Automation & Frameworks:** Selenium WebDriver | Playwright | Appium | TestNG | Cucumber BDD | Page Object Model (POM) | AI Assisted Testing
- **Programming Languages:** Java | SQL | JavaScript | TypeScript | Python
- **API Testing:** REST Assured | Postman | API Automation | JSON Schema Validation
- **Database Testing:** SQL | Database Validation | Backend Data Verification
- **Testing Types:** Manual Testing | Functional Testing | Regression Testing | Smoke Testing | Sanity Testing | End-to-End Testing | Cross-Browser Testing
- **CI/CD & Tools:** Jenkins | GitHub Actions | Docker | Maven | Git | GitHub | Jira | TestRail
- **Performance Testing:** JMeter | Load Testing | Stress Testing
- **Methodologies:** Agile Scrum | SDLC | STLC | Defect Triage | Release Validation | Defect Lifecycle

Employment History

QA Automation Engineer | Clikon Technologies Pvt Ltd, Noida | June 2024 – Present

- Designed, executed and automated 300+ UI, API and database test cases across E-Retail, IT Help Desk and Healthcare Recruitment domains.
- Developed and maintained Selenium WebDriver and Playwright automation frameworks using Java, TypeScript, TestNG and Page Object Model (POM).
- Performed Manual, Functional, Regression, Smoke, API, Database and Cross-Browser Testing throughout Agile release cycles.
- Validated REST APIs using REST Assured and Postman and verified backend data using SQL queries.
- Configured GitHub Actions pipelines to run Playwright suites on every push, and used Jenkins for scheduled regression runs on the Selenium framework.
- Coordinated with developers, business analysts, and product owners across sprint planning and defect triage, logging and verifying bugs in Jira through to release validation and production support.
- Used AI-assisted tools to generate test ideas, identify edge cases, create test data, and analyze failure logs, improving debugging and test design efficiency.

Projects

E-Retail Inventory Management System

Role: QA Automation Engineer

Tech Stack: Selenium WebDriver | Java | TestNG | Maven | Page Object Model | Cucumber BDD | Postman | SQL | Jira | Jenkins

- Automated 90+ Selenium WebDriver test cases across 4 core modules (Inventory, Orders, User Management, Shipment), reducing manual regression coverage for those workflows each release cycle.
- Built and maintained a Page Object Model (POM) framework, improving script reusability and maintainability.
- Validated inventory and order APIs using Postman and verified backend data with SQL queries.
- Executed Smoke, Regression, Functional and Cross-Browser testing across Chrome, Firefox and Edge.
- Configured Jenkins to execute automated test suites after deployments, reducing manual test execution effort.

Find Us Here - IT Help Desk Portal.

Role: QA Automation Engineer

Tech Stack: Selenium WebDriver | Java | TestNG | Maven | Page Object Model | Cucumber BDD | REST Assured | SQL | Jira | Jenkins

- Built a Hybrid Framework (data-driven + POM) in Selenium WebDriver for IT service request workflows, parameterizing test data via Apache POI and Excel datasets.
- Automated 70+ REST Assured API test scenarios covering CRUD, validation and negative test cases.
- Validated REST APIs using Postman and verified backend data using SQL queries.
- Maintained Maven dependencies and automated regression suites through Jenkins CI/CD.

StaffDNA - Healthcare Recruitment Platform.

Role: QA Automation Engineer

Tech Stack: Playwright | TypeScript | Page Object Model | Cucumber BDD | Postman | SQL | JMeter | Jira | GitHub Actions

- Automated 90+ Playwright test cases using TypeScript for healthcare recruitment workflows, structured using the Page Object Model (POM), making maintenance easier when UI changes.
- Executed Smoke, Regression, Sanity, Functional, API and Cross-Browser testing before production releases.
- Ran Load and Stress tests in JMeter against the help desk portal's ticket-submission endpoints, identifying response-time bottlenecks under concurrent load.
- Configured GitHub Actions to execute Playwright automation suites within CI/CD pipelines on every push.

Education

Bachelor of Technology (Computer Science and Engineering) | Dr. A.P.J Abdul Kalam Technical University
