QA AUTOMATION ENGINEER | SDET | MANUAL & AUTOMATION TESTING

PROFESSIONAL SUMMARY

QA Automation Engineer with 2+ years of hands-on experience testing enterprise web applications across E-Retail, IT Service Management, and Healthcare Recruitment domains. Experienced in building and maintaining Selenium WebDriver with Java and Playwright with TypeScript automation frameworks using Page Object Model and TestNG. Strong hands-on experience in Manual, UI, API, database, functional, regression, smoke, sanity, end-to-end, and cross-browser testing, with API automation using REST Assured and Postman and backend validation using SQL. Experienced in integrating automation suites with Jenkins and GitHub Actions and working with developers and product owners in Agile release cycles.

TECHNICAL SKILLS

- **Automation & Frameworks:** Selenium WebDriver, Playwright, TestNG, Page Object Model (POM), Cucumber BDD
- **Programming:** Java, TypeScript, JavaScript, SQL
- **API Testing:** REST Assured, Postman, JSON Schema Validation
- **Database Testing:** SQL Queries, Database Validation, Backend Data Verification
- **Testing:** Manual Testing, Test Case Design, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, End-to-End Testing, Cross-Browser Testing
- **CI/CD & Tools:** Jenkins, GitHub Actions, Maven, Git, Jira
- **Performance Testing:** JMeter, Load Testing, Stress Testing
- **Methodologies:** Agile Scrum, SDLC, STLC, Defect Triage, Defect Lifecycle, Release Validation

PROFESSIONAL EXPERIENCE

QA Automation Engineer | Clikon Technologies Pvt. Ltd., Noida June 2024 – Present

- Designed and executed manual and automated test cases covering 300+ UI, API, and database test scenarios across E-Retail, IT Help Desk, and Healthcare Recruitment applications.
- Developed and maintained Selenium WebDriver with Java and Playwright with TypeScript automation frameworks using Page Object Model (POM) and TestNG.
- Performed Functional, Regression, Smoke, Sanity, End-to-End, Cross-Browser, API, and Database Testing throughout Agile release cycles, covering both manual and automated test execution.
- Automated and validated REST APIs using REST Assured and Postman, covering CRUD, functional validation, and negative test scenarios.
- Performed database and backend validation using SQL queries to verify application data and data consistency.
- Integrated Playwright test suites with GitHub Actions for execution on every push and configured Jenkins for scheduled Selenium regression runs.
- Participated in sprint planning, defect triage, release validation, and production support, collaborating with developers, business analysts, and product owners.
- Identified, reproduced, documented, tracked, and verified defects in Jira through resolution and release validation.

PROJECTS

E-Retail Inventory Management System

Tech Stack: Selenium WebDriver, Java, TestNG, Maven, Page Object Model, Cucumber BDD, Postman, SQL, Jira, Jenkins

- Designed and automated 90+ Selenium WebDriver test cases covering Inventory, Orders, User Management, and Shipment workflows.
- Built and maintained a reusable Page Object Model (POM) framework to support structured and maintainable automation.
- Performed Functional, Smoke, Regression, and Cross-Browser Testing across Chrome, Firefox, and Edge as part of release validation.
- Validated inventory and order APIs using Postman and verified corresponding backend data using SQL queries.
- Configured Jenkins to execute automated test suites after deployments and support recurring regression testing.

Find Us Here – IT Help Desk Portal

Tech Stack: Selenium WebDriver, Java, TestNG, Maven, Page Object Model, Cucumber BDD, REST Assured, SQL, Jira, Jenkins

- Built a hybrid Selenium WebDriver framework combining Data-Driven Testing and Page Object Model (POM) for IT service request workflows.
- Parameterized test data using Apache POI and Excel datasets to support reusable and data-driven test execution.
- Automated 70+ REST Assured API test scenarios covering CRUD operations, validation, and negative test cases.
- Validated REST APIs using Postman and performed backend data verification using SQL queries.
- Maintained Maven dependencies and executed automated regression test suites through Jenkins CI/CD.

StaffDNA – Healthcare Recruitment Platform

Tech Stack: Playwright, TypeScript, Page Object Model, Cucumber BDD, Postman, SQL, JMeter, Jira, GitHub Actions

- Automated 90+ Playwright test cases using TypeScript for healthcare recruitment workflows using Page Object Model (POM).
- Executed Functional, Smoke, Regression, Sanity, API, and Cross-Browser Testing as part of production release validation.
- Performed Load and Stress Testing using JMeter against ticket-submission endpoints and identified response-time bottlenecks under concurrent load.
- Configured GitHub Actions to execute Playwright automation suites on every push as part of the CI/CD workflow.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering | Dr. A.P.J. Abdul Kalam Technical University | **2025**
